Technical Skills

- Python
- Django
- FastAPI
- Go lang
- Git
- SQL
- PostgreSQL
- MySQL
- Html, CSS, Bootstrap
- Java Script
- Redis
- RabbitMQ
- Celery
- Pandas, Numpy
- AWS - EC2, RDS, S3, Lambda
- Docker
- Microservice
- CI-CD
- RAG Pipelines
- LLM Integrations
- LangChain
- Prompt Engineering

Personal Skills

- Leadership qualities
- Problem solving
- Adaptability
- Multi-tasking

About Me

Software Engineer with 5 years of experience building scalable backend systems, microservices, and enterprise applications using Python, Django, FastAPI, and Golang. Experienced in designing REST APIs, optimizing databases (PostgreSQL, MySQL), and implementing distributed solutions with Redis, RabbitMQ, and Celery.

Skilled in cloud and DevOps technologies including AWS (EC2, RDS, S3, Lambda), Docker, CI/CD, and Git. Proficient in HTML, CSS, Bootstrap, JavaScript, Pandas, and NumPy.

Experienced in Generative AI technologies, including RAG pipelines, LLM integrations, LangChain, prompt engineering, LLM fine-tuning, and TensorFlow. Passionate about building reliable, high-performance software, solving complex technical challenges, and continuously learning emerging technologies.

Professional Experiences

• Beinex Consulting Ltd

Senior Software engineer / 2023-Present 📍 Hybrid, kerala

- Created RESTful APIs with Django, FastAPI and Go - enabling seamless communication between front-end and back-end systems.
- Actively participated in agile development methodologies, attending daily stand-ups, sprint planning, and retrospective meetings to facilitate efficient project delivery.
- Implemented CI/CD integration, microservices architecture, and Poetry-based dependency management to enhance scalability and deployment efficiency.
- Collaborated with cross-functional teams on architecture decisions and technical strategy.
- Mentored junior developers, promoting continuous knowledge sharing and conducting code quality reviews.

• Epixel Solutions Pvt. Ltd

junior Software engineer / 2021- 2023 📍 Palakkad, kerala

- Developed and maintained robust web applications using a diverse tech stack, including Django, Golang, and Node.js.
- Collaborated with cross-functional teams to gather and analyze requirements, translating them into efficient and scalable software solutions.
- Contributed to the full software development lifecycle, from concept and design to coding, testing, deployment, and ongoing maintenance.
- Managed version control using Git, ensuring efficient codebase maintenance, version tracking, and collaboration across the development team.
- Proficiently utilized containerization technology, Docker, to streamline deployment processes and ensure consistent application environments.
- Managed PostgreSQL databases using SQL queries, Django ORM for efficient data interaction. Designed schemas, ensured accuracy, improved query performance, and maintained security while collaborating with teams to meet business needs.

Certifications / Courses

- **Programming with Google Go.**
– From Coursera.
- **HTML, CSS and JavaScript for Web Developers**
– From Coursera

Education Background

- Bharathiyar university
Bsc. Computer Science
📅 2018 - 2021
📍 Palakkad, kerala
- Govt. Polytechnic college palakkad
Diploma in Computer Hardware Engineering
📅 2018 - 2021
📍 Palakkad, kerala

Personal Projects

- **AI-Powered Customer Support Chatbot (RAG)**

Technologies: Python, FastAPI, LangChain, OpenAI/Gemini, ChromaDB, Docker

- Developed a Retrieval-Augmented Generation (RAG) chatbot capable of answering customer queries using company knowledge base documents.
- Implemented document ingestion, text chunking, embedding generation, and semantic search for accurate information retrieval.
- Built REST APIs using FastAPI to support conversational interactions and knowledge base management.
- Integrated vector search to provide context-aware responses with source references. Containerized the application using Docker for simplified deployment and scalability.
